**23. – 26.4. 2024
FRANKFURT/MAIN**

SUSTAINABILITY IS OUR DRIVING FORCE

Be part of our first TECHTEXTIL-Exhibition between 23. - 26. April 2024.

Enjoy a little Swiss flair at our Techtextil stand E01, Hall 12 in Frankfurt and find out more about our speciality chemicals.

We are looking forward to seeing you!

Dear readers,
dear friends of Textilcolor

In recent months, unfortunately, we have received some not-so-positive news from our customers. Such feedback drives us even more to develop new products, innovations, and well-founded solutions with our customers. Particularly in the field of sustainability, we have already achieved significant success with our clients. As a result, they have been able to increase their efficiency, reduce costs, and position themselves better for the future. Our resource management, which offers great savings potential, is gaining momentum and is highly regarded by our partners.

We are excited to inaugurate our new booth at Techtextil in Frankfurt this April and look forward to your visit. Learn more about our latest developments on-site and meet our team in person. We are here for you and are eager to hear your feedback.

Thank you for the numerous responses to our TC-News that we received due to the last issue. We always look forward to constructive exchanges with our partners around the world. Please feel free to contact me personally or our marketing team directly.

See you soon, enjoy the springtime, and visit us in Switzerland and in Frankfurt.

Best Regards,
Your Textilcolor AG / Detlef Fischer

SUSTAINABILITY IS OUR DRIVING FORCE

RESOURCE SAVING TECHNOLOGIES

Textilcolor technologies for significant savings in production time, water and energy, to reduce the overall carbon footprint.

The production of chemical products is not only very energy-intensive; a large part of the natural gas is also used as raw material for chemical products. Government measures are all the more serious when it comes to savings or rationing of raw materials. Careful use of our resources is becoming increasingly important.

Textilcolor AG has been working on developments in sustainable technologies for many years. The focus is on the use of innovative and renewable raw materials, as well as saving energy in the application of the products.

Learn more about our broad portfolio of resource- and energy-saving technologies: 0041-(0)81 786 11-11

Everyone is talking about it, we are doing it, come and see us, we are here for you!
