

ITMA in Singapore 2025

Textilcolor would like to express its sincere thanks to the numerous visitors who attended ITMA in Singapore. The trade fair provided an excellent opportunity to make many new contacts and engage in interesting professional discussions. It was particularly pleasing to see how dynamic and lively the textile industry is in this region.

Textilcolor looks forward to future cooperation and further exchange.

Dear readers, dear friends of Textilcolor

ITMA Asia, the effort, hard work and many hours spent in preparation have paid off. We had a very large turnout and were able to have many good discussions with our customers. Next year, we will once again be attending Techtextil in Frankfurt and the year after that, ITMA in Hanover with our stand. We are already looking forward to seeing you. In the last quarter, we have implemented some very promising projects. For example, we were able to integrate the 'Brand Management' from the former Schoeller Technologies AG into our company. There is great demand for the technologies 'coolcolors, enerG, Dry3, RepelPro' and, of course, 'Pyroshell' technology. We have been involved in developing this technology for years and have now also been able to take over the application patent. The outstanding properties of this technology were known to our customers and we were able to conclude an 'exclusive contract for Europe' with the companies Alpex, Majocchi and Trans-Textil. We were able to present the technology to these manufacturers and also implement it in their factories. Now it is time for our clothing partners to introduce this safety feature and technology into and with their products. Demand is high and we look forward to taking the next steps in the field of clothing for the fire brigade, police, civil defence and military. Our Brand Manager Hans Kohn is looking forward to getting in touch with our brand partners. We have also been able to set new standards in the field of dyes, implementing a new colour chart in the field of reactive dyes, which presents customers with a wide range of combination options and should make dyeing easier. We look forward to your feedback. We wish you and your families a Merry Christmas and a Happy New Year. Thank you very much for your support of Textilcolor AG.

Textilcolor AG and Detlef Fischer

The entire Textilcolor team would like to thank you for your trust in our company and wishes you and your families a wonderful and blessed Christmas.

TEXTILCOLOR TECHNOLOGY BRANDS

Unique textile technologies from Switzerland

With its new brand world, Textilcolor AG presents unique textile technologies that impress with their outstanding performance, such as permanent flame retardancy, optimal protection against sunlight, super-fast drying, and fluorine-free water and dirt repellency. We provide our customers and partners with Textilcolor Technology Brands for their textile production and offer a comprehensive range of services:

- Comprehensive laboratory and formulation services
- Quality testing
- Technical support for equipment
- Development of customised implementation solutions
- Support for marketing and sales
